K. P. GROUP OF COMPANIES

Company Profile

India was the star attraction, a land of fascination in 14th -15th century as Indian Spices were the most required ingredients in food preparations. Europeans risked their lives in those days to reach India and procure Indian exotic spices. The story of spices is indeed very spicy, fascinating, full of adventure & courage of fearless European navigators on sea route to East, along the coast of Africa and Malabar and Southern coast of India. Spices were so precious; they were used as currency for trade, which led to wars among European states. Now the Search is Over. We at K.P. has fairly long history of experience, knowledge, dedication for quality in the trade of Spices & seeds. Three generations and 50 years of working, we declare with confidence, 'we know our onions. When you deal with K.P. you know that you're dealing with a company of repute, experience and knowledge. The products delivered are of world class quality, meeting all international food/agriculture standards. Spices and Seeds, are natural products, usually vary in quality depending upon geographical area where they are grown. To ensure consistency, here is a company that is fully integrated vertically — from farms to warehouses to processing units to delivery points to distributors world over. Thus the company possesses its own infrastructure from A to Z. Our total involvement at all stages from plantations to processing, to quality checks, to storage & maintenance of storage areas, sterilizations / fumigations, transportation, distributions etc. makes us a reliable partner world over. Our strategic location — Unjha (N. Guj.) which is the cradle of world's spice market, is the unique advantage for buyers overseas.

Kantilal Pransukhram & Co. (since 1962)
