## FINAL MATERIAL

### Fenugreek Seeds (Trigonella foenumgraecum)

- Fenugreek is a slender annual herb of the pea family (Fabaceae). It was used by the ancient Egyptians and is mentioned in medical writings in their tombs. The Romans grew it as fodder for their cattles. Historically, the main usage of fenugreek was medicinal rather than as a labour. The botanical name Trigonella refers to the angular seeds and foenum graecum translates as 'Greek hay', which explains its use as cattle feeds

#### A] General :

1	Color	Yellow Green/brown colored
2	Odor	Characteristic - slightly sweet and spicy
3	Appearance	Irregular shaped medium brown and green seed
4	Flavor / Taste	Typical

#### B] Physical Test:

1	Extraneous Foreign Matter	% by Weight	ASTA	Max 00.50%
2	Moisture	% by V/W	ESA	Max.12.0 %
3	Excreta Mammalian	By Mg./Lb	ASTA	Max 3.0
4	Excreta Other	By Mg./Lb	ASTA	Max 5.0
5	Ash. Max	% by Weight	ESA	Max 7.0%
6	Insect Defiled / Infested	% by Weight	ASTA	Max 1.0%
